Introduction

This document serves as a general guide for determining the financial responsibility for maintenance, repairs, and other related services to University of Oregon academic and general education buildings. **It does not address auxiliaries, services centers, or some other units, which are managed as self-supporting units that are charged for services.**

Campus Planning and Facilities Management (previously Campus Operations along with Campus Planning, Design and Construction), is responsible for constructing and maintaining the structure and infrastructure of the main campus buildings and grounds within a prescribed budget. Campus Planning and Facilities Management (CPFM) includes Campus Planning, Facilities Services, Utilities and Energy (formerly Central Power Station), Design and Construction, and Office of Sustainability.

This guide provides a broad overview of funding responsibilities for the basic services provided by CPFM. Skilled trades personnel in the Facilities Services unit will perform the work. If you have questions about services not listed, please contact our Customer Service Center at (541) 346-2319.

CPFM conforms to the ‘Campus Construction Standards’, which can be accessed at: http://cpdc.uoregon.edu/policies-and-documents/policies-and-documents/standards.

As a campus-wide practice, CPFM is the **sole provider** of alteration, maintenance, and repair of facilities at the University of Oregon. This practice is in place to minimize the incidence of statutory and regulatory violations, maintain standards of quality and appearance, provide appropriate coordination of work, maintain a safe work environment, and preserve the integrity of structures and systems.

**Funding Responsibilities**

This guide identifies the campus policies for financial responsibility for the CPFM facility management, remodel, maintenance, and repair services listed. CPFM receives an annual appropriation of central funds for basic maintenance and operations of campus academic facilities.

“CPFM Responsibility” signifies funding by the CPFM general fund annual budget. “Department Responsibility” signifies funding by the department being serviced, which is billed to the department’s index. Services that are requested can be called in to (541) 346-2319 or emailed to esc@uoregon.edu or submitted on-line on the CPFM website under the ‘about’ tab/Submit a Self-Service Request. A work order will be generated by CPFM. **Designation as a “department funding responsibility” does not imply that work may be performed or managed by departments.**

Funding responsibilities outlined in this guide do not replace existing Memoranda of Understanding between CPFM and individual departments on specified facilities or processes.
**Buildings/General Furnishings**

CPFM, through Facilities Services, provides routine maintenance and repairs to university buildings and to general building furnishings in public areas, restrooms, classrooms and general university teaching labs. Departments are responsible for funding maintenance and repairs in departmental teaching spaces, offices, research labs, storage spaces. Any work associated with a remodel is the responsibility of the department.

**Mechanical Equipment**

Facilities Services provides routine maintenance and repairs of existing mechanical equipment installed as part of the building or building systems of campus facilities. Equipment installed specifically for departmental use require departmental funds to repair or replace. (see list below). Departmental funds are responsible for equipment inventoried to departments. Facilities Services will maintain and/or monitor equipment or systems as identified in active Memoranda of Understanding between CPFM (previously Campus Operations) and individual departments. Any work associated with a remodel is the responsibility of the department.

### Campus Utilities

CPFM, through Utilities and Energy, is responsible for the production and delivery of utilities to the campus. This includes steam, chilled water, electricity and main and standby power. Additionally, Utility and Energy provides routine maintenance and repair of existing campus tunnels, chilled and domestic water lines, compressed air and condensate lines, sanitary sewer lines, steam, and storm sewer lines. We provide routine maintenance and repairs of existing electric service, meters and metering components; and are responsible for existing water and air lines that just enter a private department space or lab. CPMF is responsible for existing gas, steam, storm and sewer lines to inside a building wall. Any work associated with a remodel is the responsibility of the department.
