

**UNIVERSITY OF OREGON
CLASSROOM SPACE UTILIZATION STUDY
FALL TERM 2016**

The Fall Term 2016 Classroom Space Utilization Study is an analysis of total and average scheduled hours of occupancy per week of full-time classrooms, seminar rooms, and classroom student stations (seats). Class labs are not analyzed in this study; however, the exhibits and appendices include data on room use and student-station use of lower-division and upper-division class labs. The utilization analysis is based on student registration data (Student Centralized Administrative Reporting File, or SCARF) from the fourth week of fall term with a pull date of October 21, 2016.

Exhibits 1-3 compare the 2016 fall-term data with data from fall term 2015.¹ Exhibits 4-6 summarize the number and percentage of rooms scheduled by the hour of the day and the day of the week. Exhibits 7-9 summarize the number and percentage of student stations scheduled by the hour of the day and the day of the week. Appendices 1-6 provide detail on the number of rooms and student stations scheduled each hour of each day of the week as reported for fall 2016. Additional attachments are described on page 5.

SUMMARY

Briefly, in comparison to fall 2016, student FTE increased negligibly by 37 (.16%). The classroom pool decreased from 186 to 184 (-1.08%), and the number of student stations increased by 479 (2.79%), chiefly because of the return of COL 150, which returned 450 seats. With FTE staying relatively the same and the number of rooms decreasing, the total hours of scheduled room occupancy decreased by 321 hours (-4.92%) (see discussion below—student station occupancy). The total hours of scheduled occupancy of student stations decreased by 1,072 hours (-.41%). As a result, the average hours of room occupancy and student-station occupancy also decreased, respectively, from 35.1 to 33.7 hours/week and from 25.3 to 24.1 hours/week. However, the nearly 5% decrease in total room occupancy hours compared to the less than .5% decrease in station occupancy suggests that students increased their credit-hour loads, also borne out by the fact that while FTE increased slightly, enrollment decreased.

The following table lists the minimum objectives originally established by the State Board of Higher Education and compares fall 2015 and fall 2016 rates of use for classrooms, lower- and upper-division class labs, and student stations.

<u>Room Utilization</u>	<u>Average Hours of Scheduled Occupancy Per Week</u> ²		
	<u>Fall 2015</u>	<u>Fall 2016</u>	<u>Board Objectives</u>
Classrooms	35.1	33.7	33.0
Lower-Division Laboratories	25.3	24.7	22.0
Upper-Division Laboratories	23.1	21.6	16.0
<u>Student Station Utilization</u>			
Classroom Student Stations	25.3	24.1	20.0
Lower-Division Lab Stations	18.0	17.6	18.0
Upper-Division Lab Stations	12.8	12.9	12.0

¹ Previous Classroom Space Utilization Studies used OUS's formula for computing Student FTE. This fall's Student FTE figures have been computed using UO's formula, which is slightly different. Accordingly, we have adjusted the Fall 2015 numbers for an accurate comparison of the two terms.

² The total number of hours all rooms or all student stations were used per week divided by the total number of rooms or stations available (i.e., for student stations, 263,304 hours divided by 10,928 stations = 24.1 hours of scheduled occupancy per student station per week).

CLASSROOM USE

The figures for utilization of full-time classroom facilities (Exhibit 1, Part II) are based on a dataset of 184 full-time classrooms—general university (Registrar-controlled), jointly controlled, and departmentally controlled rooms—that were scheduled in Banner during fall term 2016. This number compares to 186 during fall 2015.

Fifteen classrooms were removed from the pool as follows: CHA 202, 203, 204, 207, 303, and 307; LIB 42 (moved to temporary classroom); LIB 322 (returned to Library); LIB 401 (temporary removal for renovation); MCK 475 (traded with CASIT for MCK 348); and PAC 8, 9, 11, 12, and 16 (building renovation and rededication). Thirteen classrooms were added or returned to the pool: ESL 193 and 199 (Registrar); OLC 201 (Oregon Law Clinic building); PLC 253 (English, moved from Temporary Classroom pool), two newly constructed rooms, PSC (Price) B040 and B042; COL 5150 (post-renovation); and GER 242, 246, 248, 301, 302, and 303 (post-exterior renovation).

The average room use was 34 hours, one hour per week less than fall 2015. Of the total 184 classrooms, 120 (65%) met or exceeded the 33 hours per week minimum standard (Attachment 4.1), down from 68% in fall 2015. Twenty-five classrooms were scheduled for at least 45 hours per week (5 fewer than last year), which represents a full daytime schedule (8:00 A.M. to 5:00 P.M.). Sixteen of those were general-university classrooms (15% of the 108 general-university classrooms); six were joint-controlled (17% of the 35-room pool); and three were departmentally controlled (7% of the 41-room pool).

Exhibit 4, room use by hour and day, shows that 9:00 A.M. through 3:00 P.M. had the highest room use (80.1%-66.3% of the full classroom pool) before dropping off significantly. Monday through Thursday 9-hour daytime use (with classes starting from 8:00 A.M. through 4:00 P.M.) showed little variation, averaging 1,189 hours each day (72% of the 9-hour maximum of 1,656 hours per room each day, down from 74% in fall 2015). The 4-day total hours of room use (8:00 A.M. through 9:00 P.M.) averaged 1,357 hours each day (53% of the 2,576 hours possible, down from 55% in fall 2015). Friday's schedule, as usual, was significantly less, with 46% of the available daytime hours scheduled.

The decrease in the total hours of room use (321 hours, or -4.92%) can be accounted for partially by the two-room reduction and partially by the loss of Chapman and Pacific classrooms, which had very high use. Of the six newly designated classrooms—two General University and four departmental—four had much lower use than those that were removed; the seven returned rooms (Columbia and Gerlinger) fared better (see Attachment 7).

General-university (Registrar), joint-controlled, and departmentally controlled classrooms (Attachments 3 and 4.1)

General-university classrooms: Of the 184 classrooms, 108 were general-university classrooms scheduled by the Office of the Registrar. During the study term these classrooms were scheduled an average of 37 hours per week, 112% of the minimum standard, a one-hour (3%), decrease from fall 2015. Eighty-seven (81%) of them met or exceeded the minimum standard. Eight (MCK 123; FR 206; MCK 345; LIB 222; DEA 206; PLC 248; MCK 240B; PLC 627) fell below 75% of the minimum standard (fewer than 25 hours per week).

Attachment 4.1 shows that the most highly scheduled general-university classrooms were DEA 301, 306, and 307 (all at 49 hrs / 148% of minimum standard; 49 stas.). The three largest general-university classrooms—STB 156 (520 stas.), COL 150 (450 stas.), and PLC 180 (344 stas.)—were scheduled, respectively, 40 hrs / 121%, 34 hrs / 103%, and 35 hrs / 106%. The other large classrooms (in the 150-300 seat range) also were occupied at or near 40-hours / week.

Joint-controlled classrooms: The 35 joint-controlled classrooms were scheduled an average of 37 hours per week, the same as fall 2015. Those with the highest scheduled occupancy were HED 146 (COE; 51 hrs / 155%) and ED 276 (COE) and FEN 105 (Math), both 49 hrs / 148%. Twenty-five of the joint-controlled classrooms, or 71%, met or exceeded the minimum standard.

Departmentally controlled classrooms: The 41 departmentally controlled classrooms were scheduled an average of 23 hours per week (70% of the minimum standard), a two-hour decrease from fall 2015. The most highly scheduled departmentally controlled classrooms were PLC 184 (English; 56 hrs / 170%) and PLC 253 (English) and VIL 202 (Theatre Arts), both at 48 hrs / 145%. Eight of the 41 rooms (20%) met or exceeded the minimum standard. Twenty-five rooms fell below 75% of the minimum standard (fewer than 25 hours per week). Allen 307, SOJC's Eric W. Allen Seminar Room, was not scheduled in Banner during fall 2016.

Factors influencing room use:

Classrooms with the highest use share several characteristics. Most have movable chairs. They are in buildings that are centrally located along the perimeter of the core campus, which provides a perception of safety, with greater lighting, foot traffic, and nearby businesses. Often they offer a centralized larger classroom and smaller proximate rooms to satisfy the need for breakout rooms. Many of the rooms have been refurbished and updated with improved equipment, wireless technology, computer and video projection, and room design and acoustics that enhance interactions and discussions, all of which makes them flexible for use by a broad variety of programs and pedagogies.

The 17 classrooms listed below, which were used fewer than 17 hours (50% of the minimum standard) are likely to have one or more of the following characteristics:

- location: located beyond the campus core;
- condition: less desirable quality, accessibility, environment, or technology, such that faculty or departments prefer not to use them for credit courses; such rooms often are used extensively for non-credit classes and other activities;
- size: classrooms or seminar rooms that allow twenty or fewer occupants generally have limited course demands (the case for five of the eight rooms below); smaller seminar classes often are scheduled in departmental conference or meeting rooms, which, because their prevalent use is not instructional, are categorized as "Temporary Classrooms" and as such are not included in the general-classroom pool;
- departmentally controlled: used for department classes that may make them inappropriate for general-university use because of restrictive teaching requirements or equipment (e.g., architecture/allied arts, law, music).

Joint-controlled:

LA 222 (24 stas.): 15 hours
VOL 307 (46 stas.): 13 hours

Departmental:

PLC 448 (15 stas.; English): 16 hours
KNI 282 (30 stas.; Law): 16 hours
ALDR 111 (31 stas.; Creative Writing/Ethnic Studies): 14 hours
CH 103 (35 stas.; Music): 14 hours
ED 115 (33 stas.; Education): 13 hours
SRC 63 (45 stas.; PE & Rec): 13 hours
PLC 410 (30 stas.; Economics): 12 hours
DEA 210 (27 stas.; Math): 12 hours
LA 100 (20 stas.; A&AA): 10 hours

STB 257 (30 stas.; Psychology): 10 hours
PLC 412 (15 stas.; Economics): 8 hours
PSC B040 (58 stas.; Library): 5 hours
MR4 114 (20 stas.; A&AA): 3 hours
OLC 201 (15 stas.; Law): 3 hours
ALL 307 (20 stas.; SOJC): not scheduled

Student-station occupancy (Exhibit 1, Part II.i. and j.):

The 184 classrooms contained 10,928 student stations, 479 more than fall 2015, largely because of the return of the 450-seat COL 150. The fall 2016 average of 24.1 hours of student-station occupancy per week exceeded the 20-hour minimum standard (Exhibit 1). Even though student FTE increased only slightly and the number of student stations increased by 4.58%, the total hours of student-station occupancy decreased only minimally by -.41%, again suggesting that students carried heavier credit loads than in fall 2015. This relative flux also resulted in the decrease by one hour/week in the average hours of student-station occupancy.

General University: The 108 general-university classrooms contained 7,884 student stations. Average student-station occupancy of the general-university classrooms during the study term was 26 hours per week, or 130% of the minimum standard, an 8% decrease from fall 2015 (Attachment 3).

Joint-controlled: These 35 classrooms contained 1,577 student stations. Average student-station occupancy was 25 hours per week, or 127% of the minimum standard, a 1% decrease from fall 2015.

Departmentally controlled: These 41 classrooms contained 1,467 student stations. Average student-station occupancy was 12.2 hours per week, or 61% of the minimum standard, a half-hour/week (3%) decrease from fall 2015.

Factors influencing student-station use:

The current trend to schedule large lecture classes with a number of smaller discussion sections results in these smaller discussion groups meeting in available rooms that may or may not be optimally sized. In these cases, availability becomes the primary criterion. There is no indication, however, that larger classes were unable to find meeting spaces because they were displaced by smaller classes.

Rooms with more advanced design, acoustical, and technological capabilities are in greater demand, no matter what size the class, than are more suitably sized classrooms. In these cases, technology rather than room size becomes the primary scheduling criterion.

Optimization (fitting class size to room capacity)

Fitting class enrollment to student station capacity:

Attachments 6.1 and 6.2 list each classroom (by room and by controlling unit) and give a percentage of how many courses scheduled in each room met or exceeded 70% of the room's student-station capacity. It is noted that the measurement of enrollment to room size is only one of many scheduling considerations.

Appendix 6: Number of Upper Division Class Lab Stations Scheduled Each Hour

Attachment 1, "Programming Rules," describes the most important rules by which the data-warehouse application summarizes data.

Attachment 2 is a list of the classrooms from which the data were derived sorted by utilization code (CR classroom, TCR temporary classroom, LDL lower-division lab, and UDL upper-division lab).

Attachment 3 compares fall 2014 room and student-station use to that of fall 2013. This spreadsheet groups the rooms by scheduling priority (Registrar, joint-use, and departments).

Attachment 4 sorts by highest to lowest percentage classroom use (4.1), station use (4.2), and room "capacity" (number of stations) (4.3).

Attachment 5, the SCARF data, details the classes scheduled in each of the 186 classrooms. The information is available also for temporary classrooms and upper-division and lower-division labs, but is not included in this packet.

Attachment 6 contains information on optimization by room—i.e., of the total number of classes scheduled in each room, how many had an enrollment that was at least 70% of the room's student-station capacity. Attachment 6.1 sorts the data by room; 6.2 sorts from highest to lowest optimization percentage.

Attachment 7 compares the room and station utilization of the classrooms that were no longer available during fall 2016 to those classrooms that were new or returned to active use.
