UO CAMPUS PHYSICAL FRAMEWORK VISION

PROJECT GOAL:

To create a comprehensive physical framework vision of open spaces and buildings, which will bring greater specificity to the *Campus Plan*, better inform decisions on how to accommodate growth and change, and preserve the beauty and functionality of the campus.

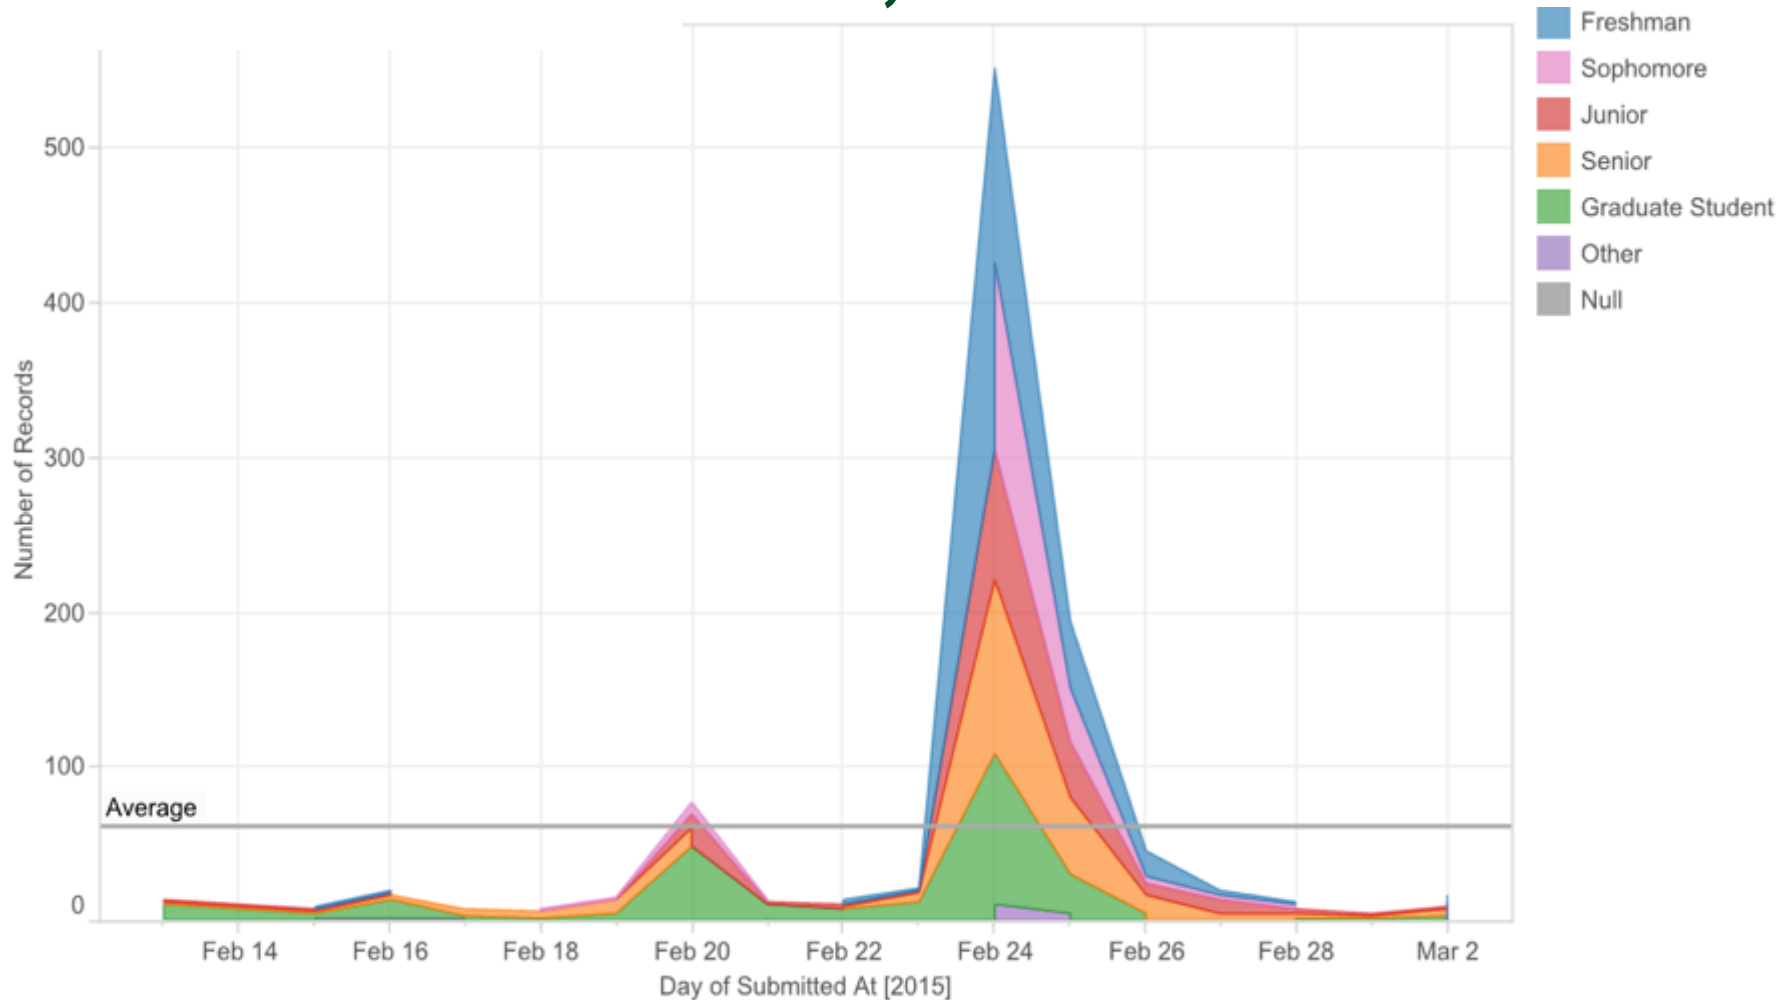

THE MY CAMPUS SURVEY:

As part of the UO Campus Physical Framework Vision project, campus planners developed an interactive on-line survey to ask the campus community about the special places on campus they love, places that need work, and how they move around the campus.

The survey was open for two weeks in February, 2015 and yielded nearly 1,400 responses – 75% from students. Survey results are being used as part of the Framework Vision project to evaluate existing conditions, preferences, patterns of use, and movement across campus to help inform the planning process.
