FOREWORD TO THE FOURTH EDITION

Fourth Edition (July 2019)

The fourth edition of the Campus Plan includes amendments approved since 2014. It also includes editorial and typographical corrections intended to clarify the original intent of the document as well as updated facts and figures. The approved plan amendments address the following areas:

Maximum Allowed Densities and Open Space Framework Expansion
This density amendment also enhanced the open-space framework in the area between Bean Hall, Hamilton Hall, the Ford Alumni Center, and the Matthew Knight Arena per the Campus Physical Framework Vision Project.

University of Oregon Model for Sustainable Development (OMSD)
This amendment provided an update to the OMSD based on data gathered since 2011. The Energy and LEED goal sections were amended and a social equity section was added to the People goal.

The following changes were previously incorporated into the fourth edition:

Southeast Campus - Maximum Allowed Density
This amendment changes the maximum allowed density to accommodate the Jane Sanders Softball Stadium Project.

East Campus - Maximum Allowed Density
This amendment changes the maximum allowed density to accommodate the New Residence Hall Project south of Global Scholar’s Hall.

Third Edition (August 2014)

The following changes were previously incorporated into the third edition:

East Campus Open-space Framework
The Central Kitchen and Woodshop Project, which is located in the East Campus Area, triggered the requirement to prepare and adopt an open-space framework plan for the affected area (the block bounded by 17th and 19th Avenues and Columbia and Moss Streets).

EMU Area Open-space Framework
The EMU Expansion and Renovation Project resulted in expansion of the open-space framework in the surrounding area. A new open space - EMU Green - was established.

Northeast Campus - Maximum Allowed Density Technical Correction
This amendment accounts for recently updated existing building measurements. The technical correction affects the maximum allowed density in the Northeast Campus Design Area.

Oregon Model for Sustainable Development Refinements
This amendment incorporates refinements to the University of Oregon Model for Sustainable Development.

The following changes were previously incorporated into the second edition:

Diversity
A new diversity pattern and a revised definition of the project user group ensures that the issue of diversity is considered during the project design to help create a campus that is welcoming to all.

East Campus Open-space Framework
The Global Scholars Hall project triggered the requirement to prepare and adopt an open-space framework plan for the affected area.

Historic Landscapes
A new Historic Landscapes pattern and principle refinements address processes for identifying and documenting historic landscapes. They provide a framework for making decisions about preferred preservation actions and future development.

Lewis Integrative Science Building (LISB) Open-space Amendments
The LISB project triggered the need
to amend the campus's open-space framework. This included amendments to the Science Green and Agate Street Entrance Green open spaces as well as the establishment of a new open space, Franklin Boulevard Axis.

**Oregon Model for Sustainable Development**
The amendments to the Sustainable Development Principle are designed to improve and replace the university's 2001 Sustainable Development Plan. The OMSD was adopted to clarify the university's focus and to strengthen best practices based upon current knowledge. It addresses the unique aspects of campus buildings and landscapes by focusing on what matters most: energy, water, and people.

Note: Refer to Appendix K for a summary of all amendments to the *Campus Plan since 2005*.
