RIVERFRONT CLEANUP

On Thursday, August 13th, Donny Addison, Jeff Ziglinski, Phil Chesbro, Bret Jensen, Aaron Reynolds, Angelina Palomino, Claire Harris, Maria Moreno, and Tony Thompson from Zero Waste and Refuse along with Nick Sloss, Aaron Maxwell, Becket DeChant, Mike McGee, Scott Tedder, and Amber Stich from Landscaping took on the monumental task of cleaning up the riverbank. UOPD also supported this effort, providing a safe area for the others to work.

The following solutions were put in play to help make this cleanup successful:

1. A dumpster at the pedestrian circle near the path down to the river.
2. Placement of two smaller receptacles near the path that will be serviced on Mondays and Thursdays.
1. On the days the receptacles are serviced, students from Zero Waste will pick up litter in the nearby areas.

Photos & Updates from Josh Chadwick and the Mechanical Shop

The plumbing crew has been installing hundreds of touch free faucets all across campus to help combat the Corona virus. Photo upper left shows **Ron Warren** getting a new hands free faucet ready to install.

Center photo shows **Brad Lorenz** welding up a door frame at Hedco. Brad has done welding and metal fabrication for hundreds of projects in his thirty years at the University.

The Preventative Maintenance crew has been changing thousands of filter all over campus. These filters go in the units on top of The Lewis Integrative Science Building. Over five hundred filters go in this building to help protect the equipment and condition the air. Doing the filters and belts in a building like this takes many people working together. Work control helps with shutdown notices to notify building users. The preventive maintenance team orders the filters, stages and installs them while working with the Building Automation systems team to safely stop and restart the systems.

Thanks goes out to all these people working together as a team.

Employee News

Matthew Knight Arena Office Project takes shape

The exterior of the building is nearly completed, and the plan is to move people into the offices in late October 2020. The weight room, including new flooring is complete. Branding work on the practice courts is completed, allowing courts to be used by players. Looks fantastic.

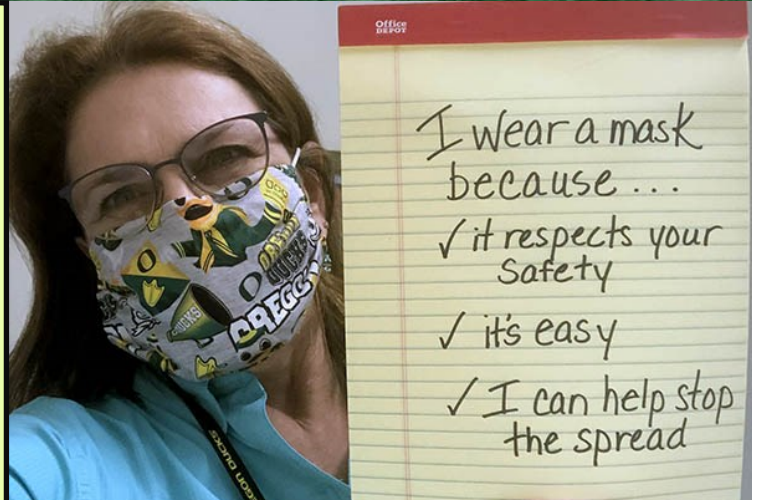

Employee News

The university is asking Ducks to submit a photo of themselves wearing a mask, and holding up a sign that explains that says “I wear a mask because ...” followed by their motivation for doing so.

Signs can be [downloaded](#), but people are also encouraged to create their own signs as well — perhaps showing some of their UO pride — anything to help spread the word and encourage others to make mask-wearing a part of their daily routine. The photos should be horizontal, and everyone in the photo should be wearing a mask.

The answers so far have ranged from following advice of health officials, to helping to protect a loved one, to once again attend sporting events in person, and the like. The university will use the images in future social media posts. Submit a photo through this [online form](#).

BACK TO SCHOOL HAIRCUT FOR THE “O” AT JOHNSON HALL & MATTHEW KNIGHT ARENA.

Office of the President

July 27, 2020

AUG 5 - 2020

Michael H. Schill, President
University of Oregon
1226 University of Oregon
Eugene, OR 97403-1226

University of Oregon

Dear President Schill,

On April 17, 2020, the Federal Emergency Management Agency (FEMA) advised Oregon Emergency Management that the State of Oregon was scheduled to receive a Battelle Critical Care Decontamination System (CCDS) to help decontaminate N-95 respirators during the COVID-19 pandemic. This system would be arriving in Oregon on April 27, 2020 and a centralized location was desired to serve the largest number of Oregon health care facilities and first responder organizations possible.

The University of Oregon (University) answered the State's call for assistance and made a venue available for the system. Michael A. Harwood, FAIA, Associate Vice President and University Architect, worked with engineers from FEMA, the Department of Defense, Battelle and the Defense Logistics Agency to ensure the site would meet the operational and security needs of the equipment and personnel. After a number of conference calls between the various parties, all agreed the Eugene location at the University would be the perfect location.

To date, more than 775 organizations from Oregon have access to the Battelle CCDS. Oregon ranks 10th in the nation for number of organizations enrolled and more than 20,000 respirators have been decontaminated as of this date with hundreds more arriving on a daily basis.

I wanted to express my thanks for your leadership and the assistance the University has provided to make this amazing partnership a success. I would like to especially recognize Associate Vice President Michael Harwood, Associate Director for Building Systems Jim Cody, Director of Security Benjamin McNulty from the University Police Department, and Director of Operations for Safety & Risk Services Krista Dillon. All of these individuals, and their respective teams, along with many others from the University, have played an essential role in ensuring the success of the CCDS in Oregon.

The contributions of the University of Oregon have made a significant impact in the state's response to the COVID-19 pandemic and I wanted to let you know your actions were recognized and appreciated.

Thank you,

Eriks J. Gabliks

COVID-19 PREPARATION FOR RESUMPTION

On Thursday, August 13th, our Core Leadership hosted **Chuck Triplett, Ken Kato and David Cates**, who walked us through the COVID-19 preparation for the resumption of in-person instruction. The Campus Readiness team--made up of facilities directors, Safety and Risk Services, the Provost's Office and CPFM staff have been working to create safe, physically-distant classrooms and common areas across campus. CPFM staff are leading much of the ground work, physically moving furniture to 6' spacing, applying floor stickers to mark approved layouts, and installing sanitizing stations outside each classroom. These efforts are being tracked and reported to senior leadership through an innovative new COVID-Readiness application developed by the UO Location Innovation Lab that draws on existing CPFM systems like the call-log and AiM work control systems.

The collage illustrates the COVID-19 preparation efforts. The top left shows a video conference with several participants. The top right displays the 'COVID-Readiness Tracker' application interface, which includes a map of the campus with green markers indicating prepared rooms. The bottom left shows a detailed view of the 'Cascade Hall - First Floor' map, highlighting specific rooms. The bottom right shows a detailed view of the 'Cascade Hall Rm. 202' setup, including a table with room status and a list of room details.

Room	Room Type	Room Status	Room Details
Room 202	Classroom	Prepared	Classroom

DIVERSITY COMMITTEE UPDATES

CPFM Diversity Committee open forum on August 6th with guest, Chief Matt Carmichael from UOPD held a candid discussion about the role of police on campus.

The VPFA Diversity Committee is very interested in gaining additional members from Facilities Services and Utilities & Energy.

The current CPFM representatives are:

Anne Schwarz—CPFM Administration
Ivy Pitts—CPFM Campus Planning
Theo Davis—CPFM Design & Construction
Eric Grape—Utilities & Energy

NEXT VIRTUAL OPEN FORUM IS SEPTEMBER 3RD, AT 11AM

September 2, 6pm-8pm

Ideas on Tap: White Supremacy and Fallen Monuments, Hosted by The Museum of Natural and Cultural History
Quench your thirst for knowledge at Ideas on Tap, the Museum of Natural and Cultural History's monthly pub talk—now served online! This month, join historian and University of Oregon doctoral candidate Marc James Carpenter for "Two Sides of the Same Coin: White Supremacy and Eugene's Pioneer Monuments," an exploration of the history behind the University of Oregon's fallen statues. The event's Zoom link will be available here on Facebook beginning August 31.

Right To A Healthy Workplace **Public · Hosted by [Mobility International USA](#), [NAACP Eugene Springfield Oregon Unit 1119](#) and [Beyond Toxics](#)**

This webinar will unpack some of the intersections between environmental degradation and unhealthy working conditions experienced by frontline communities. Impacts are unique due to the type of work, place, ability, access, nationality, and race and the application of workplace safety protocols. We will hear from environmental justice and workers rights advocates on how they are navigating unsafe or unhealthy workplaces, and actions that are being taken to address inequities, and achieve environmental and worker justice for all.

Subject: Thanks

Mike,
I just wanted to say thanks for your efforts on this. This Saturday morning on our walk we could see that there was very little trash by the river. The dumpster was obviously being used, and this, the two other trash cans and the regular litter pick-ups seem very effective. It's made a big difference!

George

Subject: Johnson Hall Parking lot

Phil, I want you to know that Mike helped me Vacex the lateral lines at the Johnson Hall Parking lot entrance last Friday. We capped them and back filled the hole/trench today Monday. He was a big help and I appreciate his help very much and the best thing is he volunteered to help I did not ask him what a great employee.

Thanks Mike.

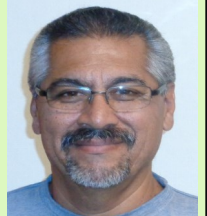

Rod

Updates

Sarah Follett, Civil Engineer with D&C—left UO on August 14th to join NW Natural.

Albert Aragon, Custodian with FS—Last day was August 20th. Congratulations to Albert who joins UO Knight Campus as a Custodial Coordinator.

Stephen Graham, Custodian with FS—His last day will be September 30th. He will be enjoying retirement. Thank you Stephen for 9 years of service.
