WHAT IS THE CAMPUS PLAN
The University of Oregon's campus will be responsive to the needs of its occupants, adaptable to emerging opportunities, and beautiful to behold. The Campus Plan provides principles and patterns that define the type and extent of future campus development.

WHAT IS BEING AMENDED
To amend the Campus Plan to incorporate the university's land north of Franklin Boulevard to accommodate essential future campus development and connect people to the Willamette River based on the new Conditional Use Permit (2018) approved by the City of Eugene.

WHY IS THE CAMPUS PLAN BEING AMENDED?
1. As part of years long process, it is imperative this area be incorporated in order to guide development and not preclude opportunities to create a framework to connect to the Willamette River and create a campus environment that defines the area consistent with
2. Land north of Franklin Blvd was previously planned for a research park under a conditional use permit that expired in 2012. Therefore, an open-space framework doesn’t currently exist.
3. Framework Vision Project identified area as necessary for accommodating growth within an open-space framework that extends our campus character.

WHAT IS BEING AMENDED?

To amend the Campus Plan to incorporate the university’s land north of Franklin Boulevard to accommodate essential future campus development and connect people to the Willamette River based on the new Conditional Use Permit (2018) approved by the City of Eugene.

WHAT IS BEING AMENDED?

The University of Oregon’s campus will be responsive to the needs of its occupants, adaptable to emerging opportunities, and beautiful to behold. The Campus Plan provides principles and patterns that define the type and extent of future campus development.

WHY ARE OPEN-SPACES IMPORTANT?

The University of Oregon campus is organized as a system of quadrangles, malls, pathways, and other open spaces and their landscapes. This organizational framework not only functions well, but also serves as a physical representation of the university’s heritage. There are four types of campus open-spaces, connected by pathways, which establish the framework to guide development.

LAND USE AND PLANNING HISTORY

1968 - Previous Land Uses
Prior to university ownership the primary use of this land was industrial and agricultural. University purchased much of the land north of the railroad tracks in 1968.

1988-2012 - Riverfront Research Park
Conditional Use Permit (RRP) (expired)
The RRP was a cooperative effort between the University of Oregon, the City of Eugene and a private developer to help develop a university related research park adjacent to the university campus. The vision for the park was to create a place where higher education and industry together create a site that fosters lifelong learning. This planning effort created the city zoning (S-RP) that requires a CUP for the land outlined in red. Three buildings east of Riverfront Parkway were constructed as a result of this plan.

1976 - Playing Fields Master Plan
Land east of the Millrace outfall was master planned for playing fields. The two existing recreation fields and the bike path alignment appear to be a result of this plan.

1950's Aerial View

1988-2012 - Riverfront Research Park

2016-2018 - Campus Physical Framework Vision Project (FVP)
The goal of the Framework Vision project was to create a comprehensive physical framework vision of open spaces and buildings, that would bring greater specificity to the Campus Plan, better inform decisions on how to accommodate growth and change, and preserve the beauty and functionality of the campus. The FVP identified the land south of the railroad tracks and north of Franklin Boulevard as necessary for accommodating future growth.

2016-2018 Master Site Plan & North Campus Conditional Use
The Master Site Plan is based on the Framework Vision Project and informed by feedback from university and community stakeholders.

- Concentrates most building development south of the tracks
- Establishes building coverage and heights well below city code allowances
- Addresses key interests in bicycle and pedestrian connectivity, river access, riparian restoration, safety, and active uses

1976 - Playing Fields Master Plan

2016-2018 Master Site Plan & North Campus Conditional Use

Prior to university ownership the primary use of this land was industrial and agricultural. University purchased much of the land north of the railroad tracks in 1968. University master planned for playing fields and recreation areas, which appear to be the result of this plan.
ANALYSIS OF CONDITIONS UNLIKELY TO CHANGE

Key Considerations
- River and Millrace
- Pedestrian and bike pathways
- Connection to river

Proposed Open-Space Framework

Key Considerations
- Expanded open space along river

PROPOSED DRAFT OPEN-SPACE FRAMEWORK

1. Opened open space along river
