University of Oregon

Thermal Systems Task Force Process

Task Force Charter:

- Review technical studies, regulatory and market structures and identify additional analysis that needs to be completed to inform decision making on the University of Oregon’s Eugene campus heating infrastructure.
- Create a forum for and inform the university community on options available to recapitalize the University of Oregon’s heating infrastructure including the factors impacting decision making and incorporate public input when recommending options to the President.
- Recommend to the president a long-term plan to support the recapitalization of the University’s campus heating infrastructure that is in alignment with our values and responsibility as prudent stakeholders with a long-term view, these include balancing;
  o reduction of greenhouse gas emissions,
  o assessment of technical feasibility risk,
  o Resiliency of campus heat production to market and natural hazards,
  o limited disruption to student campus experience, and
  o maintenance of appropriate fiscal stewardship.
